NATI PER ESSERE CONTAGIOSI

COME NASCONO I COMPONENTI SPECIALI

I componenti speciali sono sviluppati da un team giovane e appassionato che infonde questa passione in ogni prodotto, creando una dipendenza positiva nell'utente finale. La zecca, simbolo del brand, riassume perfettamente questo concetto: si attacca ad ogni persona e trasferisce grosse dosi di passione.

PUNTUALI E PRECISI, FINO AL TRAGUARDO

Il servizio di logistica è affidato a Lampa, per una gestione avanzata degli ordini e delle spedizioni, così da soddisfare sempre il cliente finale con precisione e puntualità. L'assistenza prima, durante e dopo l'ordine è senza compromessi, in modo da rispondere ad ogni esigenza e per evadere le spedizioni in tempi record.

FATTI CONTAGIARE DALLA PASSIONE!

La nostra missione è quella di creare una community di piloti e amatori che siano pronti ad essere contagiati dalla passione trasmessa dal parassita, diventando anch'essi elemento chiave nel miglioramento dei nostri componenti tramite consigli e recensioni.

L'EVOLUZIONE CHE PARTE DALLA PASSIONE

La progettazione avviene internamente partendo dalle idee del team e dai consigli dei clienti. Questi feedback vengono poi organizzati per sviluppare i progetti, le grafiche e le produzioni che portano alla realizzazione del prodotto finito. I materiali vengono accuratamente selezionati per garantire l'impiego delle migliori leghe di alluminio, di plastiche rinforzate e di parti in carbonio.

BORN TO BE CONTAGIOUS

HOW SPECIAL COMPONENTS ARE BORN

The special components are developed by a young and passionate team who infuse this passion into each product, creating a positive addiction on the end user. The tick, symbol of the brand, perfectly sums up this concept: it attacks itself to each person and transfers large doses of passion.

PUNCTUAL AND PRECISE, RIGHT TO THE FINISH LINE

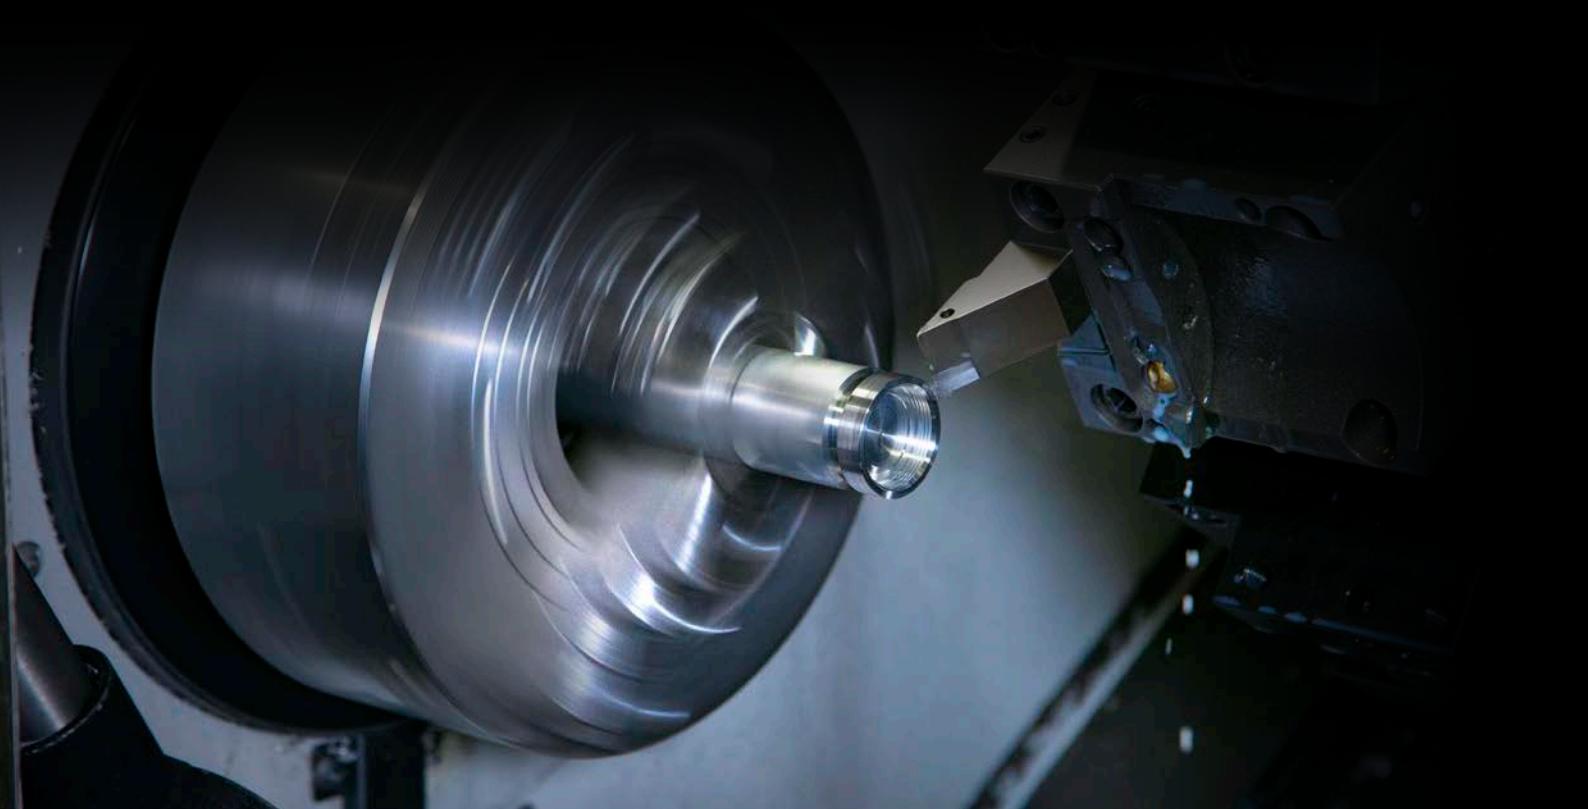

The logistics service is entrusted to Lampa, for an advanced management of orders and shipments, so as to always satisfy the end customer with precision and punctuality. The assistance before, during and after the order is uncompromising, in order to respond to every need and to process shipments in record time.

LET YOURSELF BE INFECTED BY PASSION!

Our mission is to create a community of riders and amateurs who are ready to be infected by the passion transmitted by the parasite, also themselves becoming a key element in improving our components through advice and reviews.

THE EVOLUTION THAT STARTS FROM PASSION

The design takes place internally starting from the team's ideas and customer advice. This feedback is then organized to develop the projects, graphics and productions that lead to the creation of the finished product. The materials are carefully selected to guarantee the use of the best aluminum alloys, reinforced plastics and carbon parts.

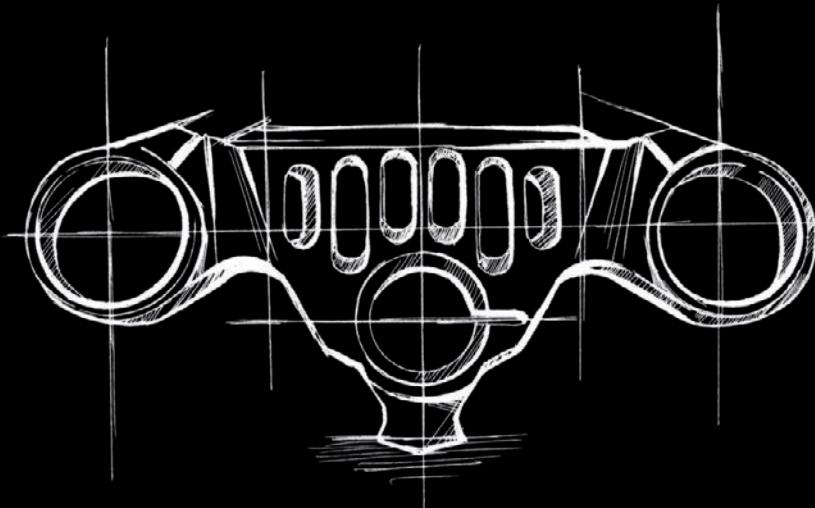

Sviluppati da motociclisti per motociclisti

Grazie all'impiego di macchine a controllo numerico di ultima generazione si ottiene una lavorazione di precisione delle migliori leghe di alluminio. I componenti vengono successivamente sottoposti al processo di ossidazione anodica e brandizzati con tecnologia laser.

DEVELOPED BY BIKERS FOR BIKERS

Thanks to the use of latest generation numerical control machines, precision machining of the best aluminum alloys is obtained. The components are subsequently subjected to the anodic oxidation process and branded with laser technology.

INIETTATI DI PASSIONE

La progettazione dei componenti speciali parte dallo sviluppo di semplici sketch preliminari per poi passare alla realizzazione delle matematiche che andranno a stampare il primo prototipo in 3D. Tutto lo sviluppo delle componenti viene eseguito internamente.

INJECTED WITH PASSION

The design of the special components starts from the development of simple preliminary sketches and then moves on to the creation of the mathematics that will allow to print the first prototype in 3D. All component development is done in-house.

BRAKE / CLUTCH LEVER

RACE

LEVA FRENO / FRIZIONE

La leva RACE è pensata per il mondo delle corse con un impugnatura arrotondata e speciali cuscinetti di scorrimento.

È realizzata in ergal 7075, viene lavorata dal pieno e trattata tramite ossidazione anodica dura superficiale.

La leva RACE permette la regolazione micrometrica della distanza tramite il registro sulla leva o controllo remoto (optional). Il sistema di snodo riduce il rischio di rottura della leva in caso di caduta. Le leve sono plug&play e compatibili con i microinterruttori di serie delle moto.

The RACE lever is designed for the racing world with a rounded grip and special sliding bearings. It is made of ergal 7075, machined from solid and treated by surface hard anodic oxidation.

The RACE lever allows the micrometric adjustment of the distance using the register on the lever or remote control (optional). The joint system reduces the risk of breaking the lever in the event of a fall. The levers are plug&play and compatible with the motorcycle's standard microswitches.

CONTROLLO REMOTO PER LEVE RACE REMOTE CONTROL FOR RACE LEVERS

Il sistema di controllo remoto permette di regolare la corsa della pompa freno senza dover rientrare ai box. Lavorato dal pieno in lega di alluminio e trattato tramite ossidazione anodica superficiale, il controllo remoto è indispensabile per l'uso agonistico. Solitamente posizionato sul semi-manubrio sinistro consente di regolare la leva del freno direttamente con la mano sinistra.

The remote control system allows to adjust the stroke of the master cylinder without having to go back to the pits. Machined from solid aluminum alloy and treated by surface anodic oxidation, the remote control is essential for competitive use. Usually positioned on the left semi-handlebar, it allows to adjust the brake lever directly with your left hand.

STREET

LEVA FRENO / FRIZIONE

La leva STREET offre un look ricercato e la possibilità di personalizzazione tramite il finalino colorato regolabile in lunghezza. Realizzata in ergal 7075, viene lavorata dal pieno e trattata tramite ossidazione anodica dura superficiale.

La leva STREET è snodabile e regolabile in 5 posizioni tramite apposito registro. Il sistema di snodo riduce il rischio di rottura della leva in caso di caduta. Le leve sono plug&play e compatibili con i microinterruttori di serie delle moto. Terminale leva da acquistare separatamente.

The STREET lever offers a refined look and the possibility of customization through the colored end piece adjustable in length. Made of ergal 7075, it is machined from solid and treated by surface hard anodic oxidation.

The STREET lever is articulated and adjustable in 5 positions using a special register. The joint system reduces the risk of breaking the lever in the event of a fall. The levers are plug&play and compatible with the motorcycle's standard microswitches. Lever end to be purchased separately.

TERMINALE COLORATO PER LEVA FRENO / FRIZIONE

Specifico per leve Street, realizzato in alluminio tramite macchine a controllo numerico e con successiva anodizzazione superficiale.

COLORED TERMINAL FOR BRAKE / CLUTCH LEVER

Specific for Street levers, made of aluminum using numerical control machines and with subsequent surface anodization.

OFF-SET 25

BRACCIALE SEMIMANUBRIO

Bracciale semimanubrio off-set 25 ricavato dal pieno e con successivo trattamento di anodizzazione superficiale. Offre un'inclinazione del manubrio di 7 gradi con un'altezza del collare di 32 millimetri. Per garantire maggiore sicurezza, la vite di bloccaggio tubo ha la funzione di sicura. Compatibile con tubi da 250 mm.

Off-set 25 half-handlebar bracelet machined from solid and with subsequent surface anodizing treatment. It offers a 7 degree handlebar tilt with a 32 mm collar height. To ensure greater safety, the tube locking screw has a safety function. Compatible with 250 mm tubes.

\varnothing mm	Inclinazione Inclination	Altezza Height	Off-Set	Sinistro Left	Destro Right

LEVER PROTECTION

PROTEZIONE LEVA

Protezione leva freno/frizione in alluminio anodizzato e materiale termoplastico composito con fibra di vetro che ne garantisce una rigidità e resistenza superiore. Un set di espansioni permette il montaggio su tubolari con diametro da 14 a 19,5 millimetri. Dettaglio colorato personalizzabile in 7 colori.

Brake / clutch lever protection in anodized aluminum and fiberglass composite thermoplastic material which guarantees superior rigidity and resistance. A set of expansions allows mounting on tubulars with a diameter from 14 to 19.5 mm. Colored detail that can be customized in 7 colours.

BAR-ENDS

CONTRAPPESI MANUBRIO

Ø 14-19,5 mm

3 espansioni incluse
3 expansions included

Contrappesi manubrio realizzati in alluminio tramite macchine a controllo numerico e successiva anodizzazione superficiale.
Il kit include espansioni in gomma per il montaggio su tubolari di diametro interno da 14 a 19,5 millimetri.

Handlebar bar-ends made of aluminum using numerical control machines and subsequent surface anodization.
The kit includes rubber expansions for mounting on tubulars with internal diameter from 14 to 19.5 mm.

TURN SIGNALS

INDICATORI DI DIREZIONE

PROJECT 1

Omologati
Homologated

Art.	Colore	Colour
PTS001N	Nero	Black

Gli indicatori di direzione Project 1 offrono un design essenziale, ipermoderno creando un nuovo riferimento nel settore degli indicatori. L'utilizzo di tecnologia a led COB di ultimissima generazione e le dimensioni della parte luminosa garantiscono una visibilità senza precedenti, rispettando le omologazioni per l'utilizzo stradale.

The Project 1 direction indicators offer an essential, hyper-modern design creating a new reference in the indicator sector. The use of the latest generation COB LED technology and the dimensions of the luminous part guarantee unprecedented visibility while respecting the approvals for road use.

TURN SIGNALS

PROJECT 2

INDICATORI DI DIREZIONE

Omologati
Homologated

Art.	Colore	Colour
PTS002N	Nero	Black

Gli indicatori di direzione Project 2 adottano un design ad aletta che ne esalta l'aerodinamicità, offrono una straordinaria visibilità grazie all'utilizzo della tecnologia a led COB di ultimissima generazione. Un design ricercato in tutti i dettagli permette l'utilizzo degli indicatori in 2 posizioni ed entrambe omologate per l'utilizzo stradale.

The Project 2 direction indicators adopt a wing design that enhances their aerodynamics, they offer extraordinary visibility thanks to the use of the latest generation COB LED technology.

A refined design in all the details allows the use of the indicators in 2 positions and both approved for road use.

FUEL TANK CAP FLANGE

**FLANGIA PER TAPPO
SERBATOIO CARBURANTE**

La flangia per il tappo serbatoio carburante è lavorata dal pieno tramite macchine a controllo numerico e viene successivamente sottoposta al processo di anodizzazione dura superficiale.

La flangia per il tappo del serbatoio sostituisce senza bisogno di modifiche quella originale. Il tappo di chiusura viene venduto separatamente per consentirne la personalizzazione.

The flange for the fuel tank cap is machined from solid using numerical control machines and is then subjected to the surface hard anodizing process. The flange for the tank cap replaces the original one without the need for modifications.

The tank cap closure is sold separately for customization.

CHIUSURA TAPPO SERBATOIO CARBURANTE

La chiusura a sgancio rapido (senza chiave) per il tappo del serbatoio carburante viene lavorata dal pieno tramite macchine a controllo numerico. Viene successivamente sottoposta al processo di anodizzazione dura superficiale.

Prodotto compatibile con le flange serbatoio Paraxite.

FUEL TANK CAP CLOSURE

The quick release (keyless) tank cap is CNC machined from solid material. It is then subjected to the surface hard anodizing process. The closure for the tank cap replaces the original one without any need for modifications.

Product compatible with Paraxite tank flanges.

OIL TANK

SERBATOIO OLIO FRENO E FRIZIONE

Il kit di serbatoi olio freno e frizione include tre uscite (inclinazione verticale, a 45 gradi e a 90 gradi) due staffe metalliche e guarnizioni complete. I serbatoi sono lavorati dal pieno tramite macchine a controllo numerico e vengono successivamente sottoposti al processo di anodizzazione superficiale.

The brake and clutch fluid oil tank kit includes three outlets (vertical, 45 degrees and 90 degrees) two metal brackets and complete gaskets. The tanks are machined from solid via numerically controlled machines and are subsequently subjected to the process of surface anodization.

OIL CAP

TAPPO OLIO

Tappo olio realizzato interamente in alluminio lavorato su centri di lavoro CNC. Sostituisce alla perfezione il tappo originale della moto e ne migliora il look, grazie ad un design ricercato e dal colore brillante. Include i fori per la legatura di sicurezza.

Oil cap made entirely of aluminum finished on CNC machining centres. It perfectly replaces the original cap of the motorbike and improves its look, thanks to a refined design and bright colour. Includes holes for security binding.

ENGINE PROTECTIONS

PROTEZIONI MOTORE

Protezioni motore in materiale termoplastico tecnico composito con carica del 30% di fibra di vetro che ne garantisce una rigidità e resistenza superiore.

Di facile montaggio tramite le viti comprese nel kit, sono progettate per garantire una protezione completa delle parti più esposte della moto in caso di scivolata o caduta.

Engine protection cover in composite technical thermoplastic material with a 30% fiberglass charge which guarantees superior rigidity and resistance.

Easy to assemble using the screws included in the kit and designed to guarantee complete protection of the most exposed parts of the motorcycle in the event of a slip or fall.
