

SPIDI

RIDING SYSTEM

WORKBOOK 2025

RIDING SYSTEM

As humans grow increasingly interconnected with the outside world, we at SPIDI have been studying to detect and interpret the energy streams that flow near the bike, so that riders can use them to improve their comfort and safety whilst on the move.

Speed, weather, obstacles, ground conditions, traffic. As riders travel across new territories, the conditions around them constantly change. Our products are conceived to adapt accordingly.

Leveraging smart technologies and our decades-long experience in the field, SPIDI's MISSION CONTROL paves the way for a new generation of motorcycling equipment that breaks the barriers between the rider and the world beyond.

SAFETY LAB

→ Integrating the success of SPIDI design with the most advanced solutions in the field of safety, without compromise.

SPIDI's in-house SAFETY LAB is an approved team of experts and a research programme on an international scale with a declared commitment: to integrate the success of the SPIDI design with the most advanced solutions in the field of safety, without compromise.

Since the 1970s, we have been focusing on research and testing to keep improving the protection options available to motorcyclists. The results are groundbreaking innovations such as the first riding glove, the motorbike denim and the first riding jacket with integrated airbag.

Thanks to SPIDI's in-house SAFETY LAB, riders across the world have never felt so comfortable, safe and free to focus on their emotions – whether they are competing on the track, chasing adventure or commuting in the city.

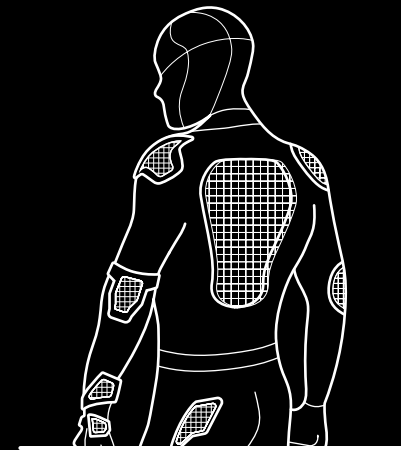

WARRIOR TECH

→ Inserts that take riders' safety to an unmatched level, opening up new scenarios for safety in mobility beyond the world of motorcycling.

After a long period of on-track experimentation, through software simulations and tests in the urban environment, the engineers of the SPIDI Community created WARRIOR TECH. Through careful study of biomechanics and ergonomics, WARRIOR TECH protects the rider in the most sensitive areas in the event of a fall. Thanks to its modular design, it adapts perfectly to the natural shapes of the human body. Its structure enhances the effect of the polymers. A protector is manufactured with unprecedented absorption capacity.

With the application of WARRIOR TECH inserts, the rider's safety is enhanced to an unmatched level. A cutting edge technology that opens up new scenarios for safety in mobility, far beyond the world of motorsports.

WARRIOR TECH

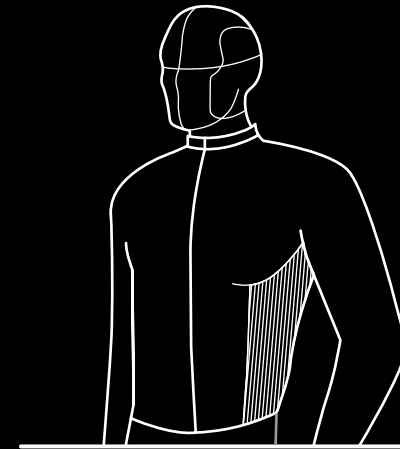

BIO-MECHANICAL DESIGN

ITALIAN LEATHER

→ High-quality, Italian crafted leather for the motorcycling world, based on a six hundred years tradition of craftsmanship.

SPIDI's location in the Chiampo Valley, Italy's most important district for leather tanning, allows it to leverage on a six hundred years old tradition of working the finest leathers from around the world. This know-how, combined with innovation and research, allows SPIDI to create leathers of the highest quality standards for use in the motorcycle world.

SPIDI selects the leathers and defines all stages of the tanning to reach the highest quality products that exceed standards. ITALIAN LEATHER is synonymous with high quality and certifies that our leathers are skilfully worked in Italy to give our products a unique look, in compliance with our health and safety standards.

ITALIANLEATHER

PREMIUM ITALIAN LEATHER

COMFORCE

→ Technical inner wear that preserves body temperature and protects riders in different weather conditions.

COMFORCE is a line born to preserve body temperature and to protect motorcycle riders from the cold and heat. The innovative motorsport underwear line was developed with shapes and materials designed to fit the most advanced hi-tech bike gear, in line with CE standards-approved anatomic protectors. COMFORCE offers exclusive features of panel-like construction, transpiration and thermo-wind protection.

The materials used are hypoallergenic, anti-bacterial, abrasion resistant, fitting and innovative. Each guarantees different kinds of technical performances in order to offer better comfort.

COMFORCE
BASIC

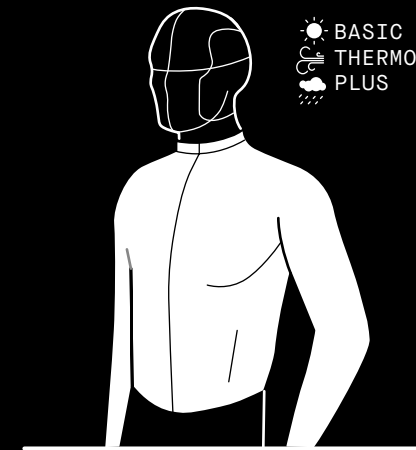

COMFORCE
THERMO

COMFORCE
PLUS

BASIC – Ideal for riding in mild or hot conditions.

THERMO – Ideal for riding in an autumn-like climate and mild and low temperatures alike

PLUS – Ideal for riding in a Nordic climate and in low temperatures

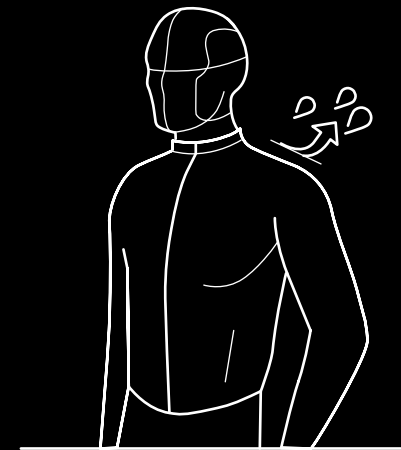

COMFORCE
MOTORSPORT HI-COMFORT

H2OUT®

→ The one and only waterproof and windproof breathable membrane that offers maximum comfort, taking into account the specific needs of motorcyclists.

H2OUT® is the only microporous waterproof and windproof breathable membrane that was designed specifically for motorcycling. Developed in co-operation with Japanese manufacturer Toray, the project was driven by a very precise – as well as ambitious – objective: to create a specific waterproof and windproof breathable membrane, with a microporosity able to guarantee maximum comfort, taking into account the specific needs of motorcyclists.

The result is a heavy-duty lining for H2OUT® technical motorcycling gear. A windproof, waterproof shield with micrometric thickness, which is breathable, light, and flexible.

H2OUT®

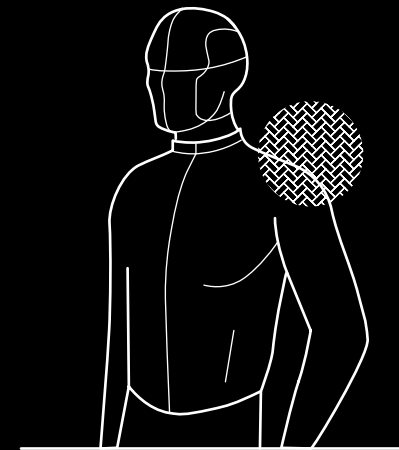

WATERPROOF WINDPROOF BREATHABLE

TEXTECH

→ A lightweight, affordable, easy-care alternative to leather. Riding materials tested in SPIDI's in-house SAFETY LAB to ensure the highest performance.

TEXTECH is SPIDI's standard to identify the best fabrics to equip riders. It was created to replace cowhide, an excellent traditional material for the production of motorcycle apparel, with fabrics that can be equally durable and at the same time lighter, more casual and easier to wash. TEXTECH describes water repellency, perspiration, windbreaking, shear strength and abrasion resistance. Each supply is tested by SPIDI's in-house SAFETY LAB to ensure it meets the required performances.

TEXTECH technology is applied to all SPIDI products using textiles, except for the H2OUT® category.

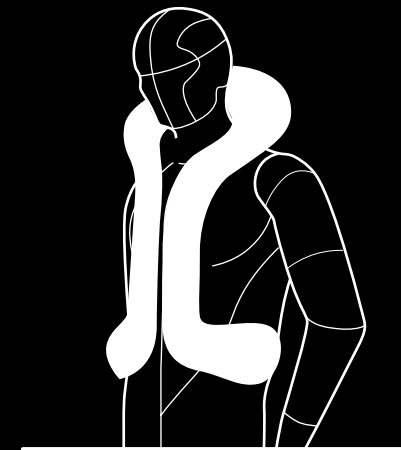

TEXTECH

HIGH-RESISTANCE FABRICS

AIRDPS

→ A motorbike-specific airbag, developed with SPIDI's Japanese partners to guarantee unprecedented accuracy and safety on two wheels.

Today tens of thousands of users benefit from the dynamic protection of the AIRDPS technology, SPIDI's motorcycle specific airbag. Developed by the in-house SAFETY LAB in conjunction with the first company to ever file the patent for motorcycles airbag in the 1990s, AIRDPS Technology has become a benchmark for safety on two wheels. Working closely with the Japanese partners for the trigger and pneumatic parts, SPIDI was able to integrate the device on several models, ensuring total efficiency. Never was a system so precise and safe in activations, nor are there external elements that may limit the effectiveness (magnetic fields, batteries, rain, cold, sand). Accuracy and safety are guaranteed by mechanical activation (performed in 179 milliseconds) through a Kevlar cord covered by a sheath. Connected to the motorcycle, it activates the cartridge in the event of a crash.

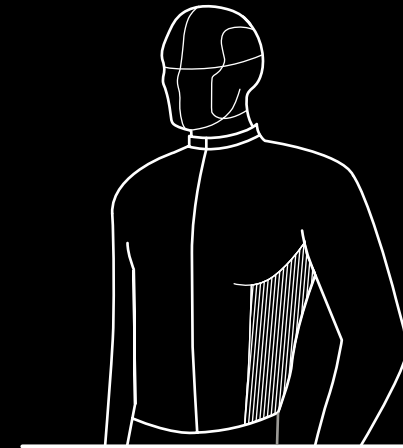

AIRDPS

MOTORCYCLE SPECIFIC AIRBAG

TECHLEATHER

→ History, research and technology converge in the best, high-performance leather guaranteeing safety and comfort for riders.

First used for motorcycling gear over seventy years ago, leather is still the best material to protect professional and performance-loving riders. Based in the world's leading leather-tanning district, since 1977 SPIDI has been selecting the best hides and the best processes for its use in the motorcycling world, in order to guarantee maximum abrasion resistance and minimal heat transfer. TECHLEATHER is the perfect mix of history, research and technology.

TECHLEATHER

HIGH-RESISTANCE LEATHER

INSIDEOUT

→ A waterproof system to be used in two configurations to protect riders from the rain, whatever its intensity.

More than a layer, INSIDE-OUT is a waterproof system that can be worn inside and outside your SPIDI jacket. It's crafted using the waterproof, windproof and breathable H2OUT® membrane, developed in-house.

Use it in the "OUT" configuration, on top of your SPIDI jacket to get 100% waterproof protection when riding under the pouring rain.

Use it in the "INSIDE" configuration when riding in drizzling conditions. The "INSIDE" configuration allows for a more comfortable ride, avoiding the rippling effect when cruising at higher speeds.

INSIDEOUT

WATERPROOF H2OUT MEMBRANE

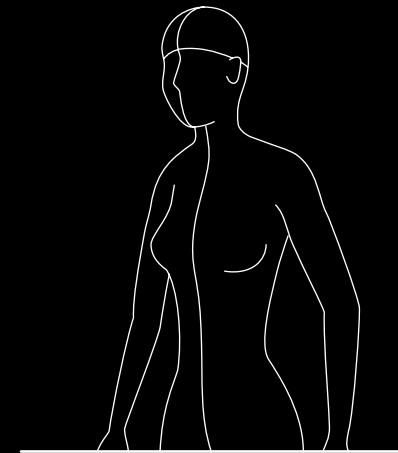

FIT FOR LADY

→ SPIDI's line designed around the female body, to offer maximum fit and protection to lady riders.

FIT FOR LADY motorcycling gear is the result of state-of-the-art research, technology and testing.

Informed by continuous anthropometric measurements and close observation of the kinematics of the female body, both when walking and riding, the cuts of our jackets enhance fit, ease of movement and femininity, both on and off the bike.

The lowest possible air resistance meets volumes designed around the female body, with the addition of specially-made protections. Materials are developed in-house to be increasingly light, elastic, and resistant. Each element is hand-crafted and tested repeatedly by our ambassadors, whose feedback helps us continuously improve the product.

FITFORLADY

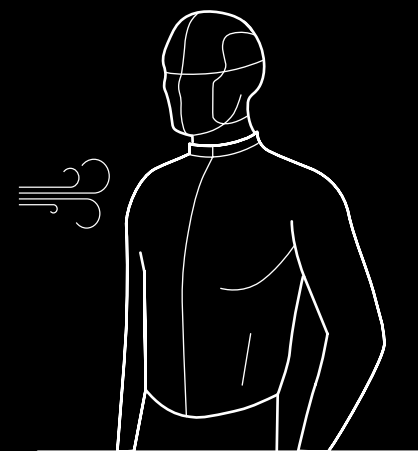

WOMEN'S MOTORCYCLE GEAR

WINDOUT

→ A technology merging high breathability with thermal protection to prevent a drop in temperature whilst riding.

A series of technical fabrics with a laminated membrane that allows maximum breathability whilst preventing wind chill. This phenomenon takes place when the cold air passes through the fabric, cooling down the body and drastically reducing comfort.

Wind chill can cause tissue to freeze, requiring immediate medical attention. A combination of technical inner layers and technical jackets, enhancing the outer layer's insulation thanks to the internal refraction of the body's temperature, can prevent this. WIND OUT is our ally for maximum temperature comfort.

WINDOUT

WINDPROOF MEMBRANE

STEP IN ARMOR

→ The layering system that revolutionises riding gear by enhancing protection without compromising comfort and style.

SPIDI reinvented the three-layer jacket, placing the protective layer close to the body. The outer layers are lightweight, more casual items of clothing. A groundbreaking innovation inspired by extreme mountaineering, the external layer is a super high-tech, ultra-lightweight hard shell protecting riders from the elements, without compromising on comfort or style.

Armor.

WARRIOR TECHNOLOGY PERFORATED ARMOR

STEP-INARMOR jackets feature an inner net layer integrating all necessary protections. This revolutionary concept allows riders to feel fully safe whilst wearing a single, lightweight item of clothing close to the body.

Soft Shell.

WINDOUT TECHNOLOGY THERMO LINER

The middle layer is a soft shell in bi-stretch material. Light, comfortable and finely designed, this casual garment can also be sported whilst taking a break from the road.

Hard Shell.

H2OUT® TECHNOLOGY LIGHTWEIGHT SHELL

Handy and versatile, the external layer is a high-tech water- and wind-proof shell protecting riders from the elements, without compromising on comfort or style.

BODY ARMOR BASED LAYERING

STEP IN WEAR

→ A combined system of shell and lining offering customisable protection to suit different weather conditions.

Based on research made in the military aeronautical apparel field, SPIDI's in-house SAFETY LAB developed STEP-IN WEAR.

The technology redefines the concept of adventure apparel and opens up new horizons of freedom. A simple but revolutionary concept, launched in 1998 with the very first ERGO jacket.

Insulation Jacket.

COMFORCE TECHNOLOGY THERMO LAYER

The base layer is an hyper-lightweight insulation thermo liner. Comfortable and finely designed, this technical garment can also be used as a stand-alone.

Waterproof Lining.

MOTORCYCLE SPECIFIC RAIN SHIELD

Designed to keep you dry, the mid layer is a high-tech waterproof, windproof, breathble shell specifically designed for motorcycling.

Armored Shell.

THE ICON OF ADVENTURE MOTORCYCLING

A design originally conceived to endure the africans moto rallyes in the late 80's. Developed by SPIDI during more than thirty years. A heavyweight, ultra resistant hard-shell with protections included.

FIT FOR LADY

→ SPIDI's line designed around the female body, to offer maximum fit and protection to lady riders.

FIT FOR LADY motorcycling gear is the result of state-of-the-art research, technology and testing.

Informed by continuous anthropometric measurements and close observation of the kinematics of the female body, both when walking and riding, the cuts of our jackets enhance fit, ease of movement and femininity, both on and off the bike.

The lowest possible air resistance meets volumes designed around the female body, with the addition of specially-made protections. Materials are developed in-house to be increasingly light, elastic, and resistant. Each element is hand crafted and tested repeatedly by our ambassadors, whose feedback helps us continuously improve the product.

LEATHER JACKETS AND PANTS - Zip Matching

→ Please refer to the table below and purchase the table below and purchase the zip connection adapter where indicated.

All H2Out category items (man and lady) have a zip fastening wich can connect any jacket to any pant indipendently from its size. This particular feature characterizes also lady leather products included in 2023 workbook. As for man leather products instead.

→ V89 SJ-BP

→ V90 BJ-SP

Zip Matching Scheme - Man Leather				
Jacket Size 	44-54		56-64	
Zip Connection Adapter 	-	V89	V90	-
Pants Size 	44-54	56-64	44-54	56-64

 Gant moto certifié avec coques de protection certifiées Niv. 1

MATERIAL ICONS OVERVIEW

Tear, cut and intrusion top resistant Superfabric
 Superfabric tessuto ad altissima resistenza allo strappo, taglio e penetrazione
 Tejido de muy alta resistencia al desgarre, al corte y a la penetración
 Super reiß-, schnitt- und stich- fester Stoff
 Tissu à très haute résistance à la déchirure, coupe, pénétration

Fabric with an extremely high resistance to cutting, tearing, bursting, abrasion
 Tessuto misto cotone ad altissima resistenza al taglio, strappo, scoppio, abrasione
 Tejido con una muy alta resistencia al corte, desgarro y abrasión
 Besonders hohe Widerstandsfähigkeit des Gewebes gegen Schneiden, Reißen, Aufplatzen, Abrieb
 Tissu mélange de coton avec très haute résistance à la découpe, déchirure, éclatement, abrasion

High tenacity polyamide fabric
 Tessuto di poliammide alta tenacità
 Tejido de poliamida con una muy alta resistencia
 Hochfestes Polyamid Gewebe
 Tissu polyamide haute ténacité

The best retroreflective product
 Il miglior prodotto retroriflettente
 El mejor producto retrorrefectante
 Das beste retrorreflektierende Produkt
 Le meilleur produit rétroréfléchissant

Fabric that maximizes warmth and wicking
 Tessuto in grado di massimizzare il calore e controllare la traspirazione
 Tejido que maximiza el calor y la transpiración
 Stoff, der optimale Feuchtigkeitkeits- und Wärmeregulierung ermöglicht
 Tissu qui maximise la chaleur et transpiration

High tear and abrasion resistant fabric containing recycled nylon with a natural cotton-touch
 Tessuto resistentissimo al taglio e all'abrasione, in nylon riciclato, naturale al tatto
 Sehr reiß- und abriebfester Stoff mit einem natürlichen Baumwoll-Touch, der recyceltes Nylon enthält
 Tejido con una alta resistencia al desgarro y a la abrasión, que contiene nylon reciclado y tiene un toque natural
 Tissu à très haute résistance à l'abrasion, contenant nylon recyclé et avec une touche naturelle

Water repellent coating
 Trattamento idrorepellente
 Tratamiento hidro-repelente
 Wasserabweisende Beschichtung
 Traitement hydrofuge

Fabric lining, disperses moisture from the body and keeps fresh
 Fodera che disperde l'umidità dal corpo e mantiene fresco
 Tejido, dispersa la humedad del cuerpo y te mantiene fresco
 Futterstoff, fördert den Feuchtigkeitstransport vom Körper und hält angenehm trocken und frisch
 Doublure qui évacue l'humidité du corps et permet de rester frais et sec

Insulated breathable wadding
 Ovatta coibente traspirante
 Acolchado aislante y transpirable
 Atmungsaktive und isolierende Watte
 Rembourrage isolante et transpirante

Excellent breathable, waterproof, windbreak and long lasting material
 Eccellente materiale traspirante, impermeabile, frangivento e di lunga durata
 Excelente material transpirable, impermeable, contravientos y de larga duración
 Hochwertiges atmungsaktives, wasserdichtes, winddichtes und langanhaltendes Material
 Excellent material transpirant, imperméable, coupe-vent et avec une longue durée de vie

Waterproof, breathable insulatin wadding
 Ovatta coibente, traspirante, idrorepellente
 Acolchado termoaislante, transpirable, hidrorrepelente
 Isolierende, atmungsaktive, Wasser abstoßende Watte
 Ouate isolante, transpirante, imperméable

Fabric allowing fast sweat dispersion
 Tessuto che permette una veloce dispersione del sudore
 Tejido que permite una rápida dispersión del sudor
 Funktionsgewebe zur schnellen Schweißableitung
 Tissu qui permet la dispersion rapide de la sueur

Mesh lining that allows sweat dissipation and thermoregulation
 Fodera in rete che permette la dissipazione del sudore e la termoregolazione
 Forro de malla que permite la disipación de sudor y la termorregulación
 Mesh-Futter, das Schweißableitung und Wärmeregulierung ermöglicht
 Doublure en mesh qui permet la dissipation de la sueur et la thermorégulation

Lighweight warmth
 Calore e leggerezza
 Wärme bei leichtem Gewicht
 Calido y ligero
 Chaleur at légèreté

Guarantees high thermal conductivity throughout the surface
 Garantisce una termicità elevata su tutta la superficie di utilizzo
 Garantiza una alta conductividad térmica en toda la superficie
 Garantiert hohe thermische Leitfähigkeit über die gesamte Oberfläche
 Assure une isolation thermique élevée sur toute la surface d'utilisation

Antibacterial stretch fabric
 Tessuto elasticizzato antibatterico
 Tejido elástico antibacteriano
 Antibakterielles Stretchgewebe
 Tissu élastique antibactérien

440gr/sq high tenacity polyamide, extreme abrasion resistance.
 Poliammide 440gr/mq ad alta tenacità, massima resistenza all'abrasione
 Poliamida 440gr/mq alta tenacidad, máxima resistencia a la abrasión
 Polyamid 440gr/qm, hohe Reißfestigkeit, höchster Abkratzenswiderstand
 Polyamide 440 gr/m² à haute ténacité, à très haute résistance à l'abrasion

High tenacity Nylon 6.6 triple twisted
 Nylon 6.6 triplo ritorto ad alta tenacità
 Nylon 6.6 de alta resistencia torcido tres veces
 Dreimal herumgedrehtes Nylon 6.6 mit höher Reißfestigkeit
 Nylon 6.6 triple retors à haute ténacité

Elastic high tenacity 6.6 Nylon, extreme abrasion resistance
 Nylon 6.6 elastico ad alta tenacità, massima resistenza all'abrasione
 Nylon 6.6 elástico, alta tenacidad, máxima resistencia a la abrasión
 Elastisches Nylon 6.6, hohe Reißfestigkeit, höchster Abkratzenswiderstand
 Nylon 6.6 élastique à haute ténacité, à très haute résistance à l'abrasion

High tenacity Tactel fabric, extreme wearing resistance
 Tessuto Tactel ad alta tenacità, massima resistenza all'abrasione
 Tejido Tactel alta tenacidad, máxima resistencia a la abrasión
 Stoff Tactel mit hoher Reißfestigkeit, höchster Abkratzenswiderstand
 Tissu Tactel à haute ténacité, à très haute résistance à l'abrasion

MATERIAL ICONS OVERVIEW

Tough fabric
Tessuto ad alta tenacità
Tejido de alta resistencia
Hochreißfester Stoff
Tissu à haute tenacité

Keramide reinforcements with high resistance to abrasion
Parti rinforzate in tessuto Keramide ad alta resistenza all'abrasione
Refuerzos de Keramide de alta resistencia a la abrasión
Keramide Einsätze für hohen Schutz gegen Abrieb
Renforts en Kéramide à haute résistance à l'abrasion

3 laminated layers transpiring, waterproof and windproof system
Tessuto laminato impermeabile, traspirante, frangivento a tre strati
Tejido laminado impermeable, transpirante, cortavientos de 3 capas
Undurchlässige atmungsaktive luftdichter und laminierte 3-Schichten-Stoff
Tissu laminé imperméable respirant coupe-vent à trois couches

Elastic fabric multilayer
Tessuto elastico multilayer
Tejido elástico multilayer
Elastisches mehrschichtiges Soft Cell Gewebe
Tissu élastique multilayer

Two laminated layers transpiring, waterproof and windproof system
Tessuto laminato impermeabile, traspirante, frangivento a due strati
Tejido laminado impermeable, transpirante, cortavientos de 2 capas
Undurchlässige, atmungsaktive, luftdichter und laminierte 2-Schichten-Stoff
Tissu laminé imperméable respirant coupe-vent à deux couches

High strength Polyester 1000
Tessuto ad alta tenacità in poliestere 1000
Tejido Poliéster 1000 de alta resistencia
Hochfestes Polyester 1000 Gewebe
Polyester 1000 haute ténacité

Nylon PVC

Nylon 6.6

2 layers laminated fabric, waterproof, windproof and PVC free
Tessuto laminato, 2 strati, impermeabile, frangivento, libero da PVC
Tejido dos capas, impermeable y corta-viento, libre de PVC
2-Lagen laminiertes Gewebe, wasserdicht, winddicht und PVC-frei
Tissu laminé, 2 couches, imperméable, coupe-vent, sans PVC

Nylon Polyurethan
Nylon Poliuretano
Nylon Poliuretano
Nylon Polyurethane
Nylon Polyurethane

Excellent breathability, low specific weight, sweat absorption
Ottima traspirazione, basso peso specifico, assorbimento sudore
Excelente transpirabilidad, baja gravedad específica, absorción del sudor
Ausgezeichnete Atmungsaktivität, geringes spezifisches Gewicht, Schweiß Absorption
Une excellente respirabilité, faible poids spécifique, absorption de la sueur

Very strong microfibre
Microfibra ad alta resistenza
Microfibra de alta resistencia
Hochbeständige Mikrofaser
Microfibre à haute résistance

Variable-density polyurethane shield
Scudo in poliuretano a densità variabile
Escudo en poliuretano de densidad variable
Schutzschild aus Polyurethan mit variabler Dichte
Coque en polyurethane à densité variable

Shock-absorber material of glass fibre
Materiale shock-absorber in fibra di vetro
Material shock-absorber de fibra de vidrio
Schlagdämpfendes Glasfasermaterial
Matière à absorption de chocs en fibre de verre

Aluminium
Alluminio
Aluminio
Aluminium
Aluminium

Synthetic leather suede
Pelle scamosciata sintetica
Gamuza sintética
Kunstleder Wildleder
Daim synthétique

Ripstop fabric, tear resistant
Tessuto Ripstop resistente allo strappo
Tejido Ripstop, resistente a las rasgaduras
Ripstop-Gewebe, reißfest
Ripstop, résistant à la déchirure

Punched mesh fabric
Tessuto rete traforato
Tejido de malla perforada
Gelochter Netzstoff
Tissu filet ajouré

Elasticized fabric
Tessuto elasticizzato
Tejido elástico
Stretchgewebe
Tissu élastique

Stretch and waterproof fabric, comfortable fit
Materiale elastico confortevole impermeabile
Material elástico confortable impermeable
Flexibles und wasserdichtes Gewebe, komfortabler Schnitt
Matériel élastique, imperméable et confortable

Polyester and cotton fabric
Tessuto in poliestere e cotone
Tela de poliéster y algodón
Polyester und Baumwolle
Tissu en polyester et coton

Cotton
Cotone
Algodón
Baumwolle
Coton

Cotton lining
Fodera cotone
Forro de algodón
Baumwollfutter

Reflex zones for night-riding
 Zone in reflex per l'identificazione notturna
 Zonas retroreflectantes para identificación nocturna
 Bereiche in Reflex-Material zur Erkennung bei Nacht
 Parties en reflex pour l'identification nocturne

Vented leather
 Pelle forata
 Cuero perforado
 Gelochtes Leder
 Cuir ajouré

Italian crafted premium quality leather
 Pelle di qualità superiore lavorata in Italia
 Hochwertiges Leder, in Italien bearbeitet
 Cuero de alta calidad procesado en Italia
 Cuir de première qualité travaillé en Italie

Leather thickness
 Spessore pelle
 Grosor piel
 Lederdicke
 Epaisseur cuir

High safety performance
 Alte performance di sicurezza
 Altas prestaciones de seguridad
 Hohe Sicherheitsleistung
 Haute performance de sécurité

High fitting performance
 Alta vestibilità e sensibilità alla guida
 Alta vestibilidad y sensibilidad durante la conducción
 Hohe Anpassungsergebnis
 Haute visibilité et sensibilité de conduite

Extra comfort leather
 Leggera e confortevole
 Ligera y comfortable
 Extra weiches Leder
 Légère et confortable

Cowhide
 Pelle bovina
 Piel bovina
 Rindsleder
 Cuir bovin

Deerskin
 Pelle di cervo
 Piel de ciervo
